How to read my results

- **Example of a single module result release:**

Please note that each assessment result consists of a **numeric value** (if you sat the assessment), **a code**, and **a sit count number**. The numeric value is between 0 and 100 and if you sat the assessment you will see the mark you achieved.

53: Assessment numeric mark
ME: Mark entry code (please see code table below)
1: sit count

If you were granted a deferral or mitigating circumstances concession, or you were absent from the assessment, no numeric value will be displayed, only the relevant code and sit count will be displayed. You should check both the marks column and the code column for each assessment.

Overall module mark will be displayed with a numeric value only.
